

Movie Viewing Party

Directions: Before your teacher can schedule which day the party can be, she needs to know how much time and class periods is needed to show all of the videos the class created. To figure out the answer, she gives you this equation frame to help you out.

Total number of videos to watch: _____

Length of each Video:

Video # 1: _____
Video # 2: _____
Video # 3: _____
Video # 4: _____
Video # 5: _____
Video # 6: _____
Video # 7: _____
Video # 8: _____
Video # 9: _____

Total length of videos: _____

Time for discussion/feedback per video: 2:00 min

Time for transition between each video: 1:00 min

Total time needed: _____

Length of a class period: _____

Answer these follow up questions after solving the equations above.

1. How much total time is needed for the feedback and transition?
2. Will you have enough time to watch all of the videos in one class period? If not, how many class periods will it take?
